

LUXORRO
— FEEL GENUINE AGAIN —

CARE GUIDE

*Full-Grain Genuine Leather
Laptop Bag*

ABOUT US

Back in 2015, Lucy and I bought a birthday present for our son. It took us days to pick this particular gift and we were quite excited about it. It was supposed to be an authentic leather laptop bag for his daily use. We never imagined that our expectations would be cut short by a leather bag that smelled funny and had one of the poorest stitching techniques we had seen.

For a minute we wondered if we'd made a mistake during the ordering process. We hadn't.

While this was exactly the bag we had seen online, it lacked the authenticity that comes with full-grain leather bags. It didn't feel right. It was not the kind of difference we could ignore or tolerate.

The company had a "no refund policy". They did not even bother to get back to us when we emailed them and told them what happened. Not even after spending \$240 on the bag.

We went back to the market hoping to find a bag that would meet our requirements, but after countless "leather bags" and hundreds of dollars spent, there was none.

It was sad to realize that we would not be able to gift our son the briefcase he deserved - an authentic spacious leather bag with a minimalistic look.

So we decided to make one. This is the story of Luxorro, the story of luxurious and affordable bags built from a disappointing dream in Brooklyn, NY that aims to give you the authenticity of full grain leather.

Our mission is simple - we want you to enjoy the most authentic leather briefcase without having to spend thousands of dollars.

ABOUT US

LUXURIOUS LEATHER AND MASTER CRAFTSMANSHIP.

Luxorro's leather briefcases are designed and handcrafted with the finest materials and master craftsmanship.

Our full-grain vachetta leather is vegetable-tanned, forming its premium smooth touch, natural texture, and its significant durability. Like a fine wine, our leather gets even better as it ages, developing a rich patina. The leather is rich in character and the surface is natural, not sanded or altered.

The briefcase is constructed with YKK zippers, solid brass hardware, and precision stitching with heavy bonded thread. It will withstand many years of commuting. In a nutshell: Luxorro's briefcases radiate confidence, courage, and assertiveness.

Thank You
for being part of our family!

BEN & LUCY - THE LUXORRO COMPANY

BLEEDING

Our Leather is the best. We take the time to sew our bags using full-grain cowhide leather and then oil it to give it a lifelong tight sealing.

Because we use the finest material with no chemical additives, the bag can “bleed”. Bleeding simply means that your bag will leave a mark if you rub it on other fabrics.

Don’t panic. This is natural and will wear off with time. However, if you want to make sure that it doesn’t happen even during the first few times you use it, here is the solution:

SEAL IT!

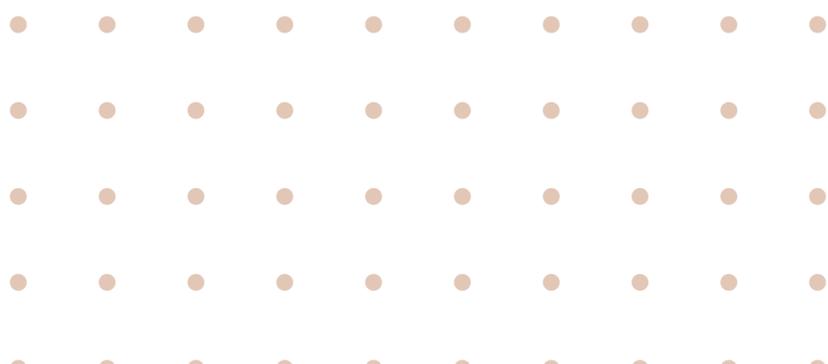

Apply a gentle layer of clear leather wax polish that will seal the oil into the leather and will prevent it from bleeding.

GET IT TODAY!

Claim your free Luxorro leather wax polish today, and watch the instructions video on how to apply it.

REPAIRING

IF YOUR BAG NEEDS REPAIRING

Repairing leather is not easy, and should only be done by a professional. If something happens to your bag that requires professional care, please email us and we will advise you to the nearest trusted specialist in your area.

Our contact info is:

support@luxorro.com

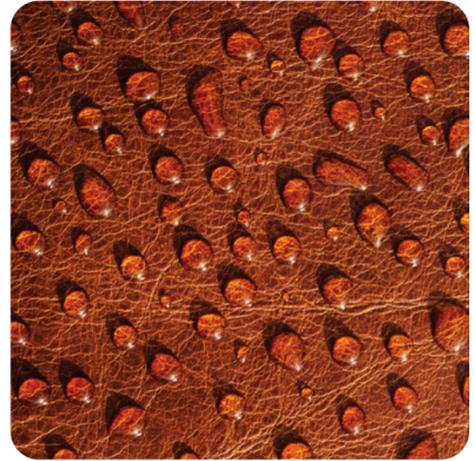

(833) - 622 - 0115

HANDLE WITH CARE

WATER

Water has no adverse effect on leather, so no need to panic if you get caught in the rain. However, make sure that your bag does not stay wet for a long time as the water can leave a permanent stain.

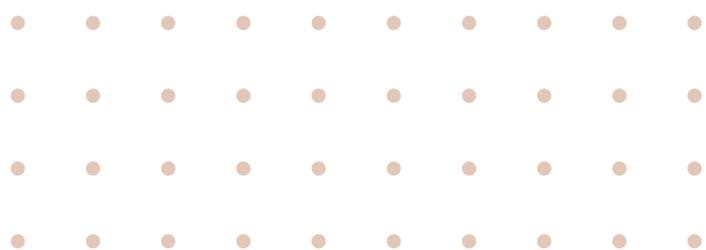

ZIPPER

Our Zippers are made of high-quality YKK materials. However, please be careful with the corners, don't pull them too fast.

HEAVY LOADING

The Luxorro bag was specifically built to carry plenty of weight. You should have no issue carrying your laptop, books, accessories, paper files, phones, pens and more.

SCRATCHES & SMELL

Did your bag get a scratch? Good for you :)

Most Leather Lovers swear by these scratches, they love them and it's the authentic look they want.

You don't like it? No problem, simply press tightly on the scratch and it should disappear.

Hopefully, your bag smells fine just like 100% Full-Grain Leather should, for some unknown reasons, sometimes the smell can turn a little nasty and some bad odor can come out of the bag.

We recommend putting it outside in the open air for a couple of hours to allow it to air out.

If that doesn't help, we recommend trying some baking soda. Baking soda absorbs bad smells and could be very beneficial to your leather bag.

Try it out on a very small section of your bag and if you see it being beneficial, go ahead and clean the entire bag.

If all this doesn't help, we recommend getting it cleaned professionally. See the next page for more details.

PROFESSIONAL CLEANING

To Professional clean your bag, either because it just deserves a refresh, or because there is some dirt or smell that just won't come out, we highly recommend buying a professional leather cleaner.

There are many out there, but we recommend the widely known “Leather Honey” Cleaner, easily found on Amazon and elsewhere, it costs a couple of bucks and can help your bag stay fresh and clean for a lifetime.

We hope that you enjoy the genuine feeling of our authentic Full-Grain Laptop Bag.
